

PROFILE

Systems architect turned intelligent automation specialist. 3+ years building production full-stack products and agentic AI workflows. Combines deep frontend craft (React, Next.js), backend architecture (Node.js, Express) and AI automation (prompt engineering, agentic workflows, RAG) to ship products that are fast, reliable and future-proof.

EXPERIENCE

Intelligent Automation | AI Engineer | 2025 - Present

Building autonomous AI agents, crafting reliable prompts, and automating complex business workflows end-to-end with LLMs.

Architecting Systems | Backend Engineer | 2023 - 2025

Designed and scaled Node.js APIs and data systems behind real-time production products.

Crafting UIs | Frontend Engineer | 2022 - 2023

Shipped pixel-perfect, animated interfaces in React & Next.js with a focus on performance and design systems.

HIGHLIGHTS

- 20+ agentic automations and AI workflows shipped to production.
- Designed 20+ REST & GraphQL APIs and scaled event streams to 2M+ daily events.
- Built design systems and cut LCP by 45% through performance-first rendering.
- Automated workflows saving client teams 40+ hours every week.

SKILLS

Core Stack	React, Next.js, TypeScript, Tailwind CSS, Framer Motion
Backend & APIs	Node.js, Express, PostgreSQL, MongoDB, GraphQL, Docker
AI & Automation	Prompt Engineering, Agentic Workflows, LangChain, RAG, OpenAI API

SELECTED PROJECTS

Nova AI Assistant

Agentic AI assistant with streaming responses, memory and a pluggable tool system. 12K+ users. Next.js, OpenAI, LangChain.

Automata Pipeline

LLM-driven workflow engine that watches triggers, reasons and executes multi-step business tasks. Saves teams 40h/week. Node.js, Agents, BullMQ.

Pulse Commerce

Headless storefront with real-time inventory and edge caching. 99.9% uptime. React, Node.js, GraphQL, Redis.

FlowDesk Analytics

Realtime analytics dashboard with live streams and role-based workspaces. 2.4M events/day. Next.js, WebSockets, PostgreSQL.
